NASTURTIIUMS

Double Sweet Scented Nasturtium

Golden Gleam. A sensational novelty in Nasturtiums. The plant forms a vigorous, large bush which throws out short runners, averaging eighteen inches. The flowers commence to come as soon as the plant nears complete development, and at the time it is in full bloom the entire plant, including the runners, is a blaze of color. The large, golden-yellow flowers average two and one-half to three inches across. They are borne on erect, stiff stems six inches in length. When well grown these flowers have the appearance of a fully double flower, and are most attractive. An ordinary sized bouquet, when allowed to remain in a room for a short period of time will fill the room with fragrance. Tr. pkt., 25 cts.; oz., 75 cts.; ¼ lb., \$2.25.

DREER'S GOLD MEDAL GLADIOLI

Our Gold Medal Blends are made up entirely of named sorts, grown separately and blended according to a carefully considered formula, so that there may be a proper balance of the various colorings and shadings. The four sections are entirely free from Primulinus sorts, or as free as it is humanly possible to keep them. We have found through bitter experience that it is impracticable, and indeed impossible, to offer Gladioli that have been grown in mixture, with any degree of satisfaction to either ourselves or our customers. Such mixtures soon become loaded with undesirable but rapidly propagating sorts and the whole color scheme is thereby thrown out of perspective.

In our blends we use only the finest named kinds and no variety enters into them that is not large flowering, with attractive color, good texture, spike and placement. All are sorts that are well worth growing individually.

Section One. The range of coloring extends from rich rose, through old rose, rose ash, orange scarlet and bright red, to deep crimson and velvety maroon. 35 cts. per doz.; \$2.25 per 100; \$18.00 per 1000.

Section Two. From palest blush to warm deep pink and soft rose, from cream and primrose to citron yellow and salmon orange, together with snowy and tinted whites and other sorts splashed or stained with deeper blending shades, the colorings of our Gold Medal No. 2 Blend carry always a strong appeal. 35 cts. per doz.; \$2.25 per 100; \$18.00 per 1000.

Section Three. Pale lavender, deep blue, lilac, heliotrope and amaranth, with velvety royal purple,—all of the rich "Pansy" shades have been garnered for this blend. 50 cts. per doz.; \$3.25 per 100; \$30.00 per 1000.

All Sections Mixed. An actual mixing in due proportion of bulbs from the three numbered blends. If you want all of the possible Gladiolus colorings, you should find them here. 35 cts. per doz.; \$2.25 per 100; \$20.00 per 1000.

Pot Plants of Cannas one of our Specialties

We are again this season preparing a large stock of Cannas established in 3-inch pots for delivery April 1st and throughout the spring months. We have specialized in these for a number of years and the annually increasing demand convinces us that these plants are appreciated by the trade.

The florist who prepares for the demand for Easter plants will find this well-established stock, of which we can make delivery either before or immediately after Easter, a profitable investment. The plants will be in proper condition to shift at once into 4- or 5-inch pots, thus making ideal plants for sale at bedding-out time.

Prices for well established 3-inch pot plants of Cannas, ready April first, are \$1.25 per doz.; \$8.00 per 100, \$75.00 per 1000 for all varieties offered above as roots at \$8.00 per 100 or less. On varieties offered above at \$10.00 per 100 or over, the price of pot plants will be the same as that quoted for roots.

Awarded Gold Medal at the International Flower Show, New York City, March, 1932.

Awarded Gold Medal Sweep Stake Prize for Garden of 1800 Olympiad Roses, Philadelphia Flower Show, March, 1932.

New Hybrid-Tea Rose, Olympiad

Olympiad is one of the late Mr. Pernet-Ducher's seedlings which did not develop its bloom until after this great rosarian passed away in 1929. It was shown in France under the name Mme. Raymond Guajard but is now known as Olympiad which name was adopted in connection with the International Olympic games held in California.

The color of Olympiad is unique, a lustrous, dark oriental-scarlet, its depth and warmth accentuated by a bright golden base and is intensified by a marvelous velvety sheen that makes its rich coloring particularly effective, especially under artificial light.

The bud is long and pointed, the petals are very broad and the blossom is magnificent in every stage of development. \$50.00 per 100; \$400.00 per 1000; 500 or more supplied at 1000 rates.

Autumn (L. B. Coddington, 1928). Novel and distinct in coloring, burnt orange streaked and marked with red. Bud of medium size developing into a cupped double, fragrant, attractive flower. \$50.00 per 100.

Betty Sutor (McGredy, 1929). Exquisite both in the long bud and high-centered, large, double, tea-scented flower. Inside of petals delicate rosy pink; as the flower opens there is a delightful reflecting of the petals which enhance the beauty of the pink tones. Strong, vigorous and free flowering. \$75.00 per 100.

Duchess of Montrose (Dobbie & Co., 1930). Sweetly scented, vermillion crimson, moderately sized, shapely buds and flowers. \$60.00 per 100.

Edith Nellie Perkins (Alex. Dickson & Sons, 1928). A Rose of outstanding merit, vigorous in growth and free flowering. Long, pointed bud; flower of good size, long lasting and fragrant, double; outside of petals orient-red shaded cerise-orange; inside salmon-pink. \$40.00 per 100.

New Hybrid-Tea Rose, Olympiad

Eduard Schill (Kordes, 1931). Large ovoid bud and very large, full double flowers. The color as the buds first unfold is of a rich coral scarlet overlying a deep old gold ground, as they develop passing to pretty coral rose with satiny golden suffusion. An effective desirable Rose. \$75.00 per 100.

Frau E. Weigand (Weigand, 1928). Bud ovoid developing to large high-centered globular, shapely, double, very lasting, fragrant Marechal Niel-scented flower; in color a brilliant yellow like Golden Emblem. Hardy, vigorous and free. \$75.00 per 100.

Golden Dawn (P. Grant, 1929). An ideal yellow garden Rose. The ovoid lemon yellow bud is heavily splashed with crimson before opening and develops into a well-formed, sweetly-scented, large, double, sunflower yellow flower that reminds one of the old favorite Marechal Niel. Strong, vigorous and free flowering. \$40.00 per 100.

Hybrid-Tea Rose, Lucie Marie
Mrs. Sam McGredy (McGredy, 1929). The color of

this beautiful variety is quite distinct from anything yet seen in Roses, a wonderful dual combination of vivid shades. A beautiful scarlet coppery-orange is heavily flushed with Lincoln-red on the outside of the petals, and these colors together give a rich and almost dazzling effect. The flowers are of large size and beautiful form, and they possess the proper fullness to make them useful for all purposes. They are very freely produced and delicately perfumed. The plant has a vigorous and exceptionally free habit and is one of the best all-purpose varieties. \$40.00 per 100.

Portadown Fragrance (McGredy, 1930). A Rose that pleases not only on account of its beautiful formation and color but also for its remarkable sweet fragrance, described by its introducer as surpassing any other variety. The bud is long-pointed; the flower very large, double, high-centered and unusually long lasting. Color brilliant orange-scarlet passing to bright rose towards the edge of the petals; of vigorous habit and free flowering. \$50.00 per 100.

Schwabenland (Pfützer, 1928). There are many pink Roses but none just like this new variety either in color or in the splendid formation of its blooms. The flowers are large, over five inches in diameter, with high spiral center, the petals having a peculiar twist or curl. In color it is a luminous rich rose-pink, retaining its brightness until the petals drop, the flowers are carried singly on long stiff stems. A strong, healthy, hardy, vigorous grower and free flowering. \$35.00 per 100.

Sir Henry Seagrave (Alex. Dickson & Sons, 1932). Large, long, well-shaped bud and very large, full, beautiful, high-centered, double flower of a deep lemon-yellow, shading deeper at base; a free perpetual bloomer and sweetly scented. \$75.00 per 100.

Swansdown (Alex. Dickson & Sons, 1929). An ideal white which in the autumn has just a tint of cream at the base of the petals. The bud is large, very long pointed of perfect shape, composed of large heavy petals and develops into a splendid, full, very sweetly-scented flower of spiral formation. \$40.00 per 100.

Vaterland (Pfützer, 1928). The most distinct dark colored variety yet introduced, deeper and richer in effect than the Hybrid-Perpetual variety Prince Camille de Rohan; a rich, deep, velvety scarlet maroon and a splendidly formed, high-centered flower of remarkable keeping qualities. The plant is of vigorous strong erect habit with healthy foliage and free and perpetual flowering; unquestionably the best of this type that has yet come to our notice. \$35.00 per 100.

Victoria Adelaide (Kordes, 1932). Exceptionally large, well-formed, double flowers of a rich golden yellow suffused with vermillion red shading deeper to the edges of the petals. An effective free flowering variety. \$75.00 per 100.

W. E. Chaplin (Chaplin, 1929). A most meritorious red Rose of the Lord Charlemont type but better being a free vigorous grower with healthy disease-resisting foliage. The bloom is large; every bud develops to a perfect, full, high-centered, very lasting moderately sweet scented flower. Color deep crimson, deepening to carmine crimson; does not blue or burn; these are carried on long strong stems, a very free continuous bloomer. \$40.00 per 100.

William Orr (McGredy & Son, 1930). Brilliant, deep, velvety crimson with a delightful glow and sheen which is retained even under unfavorable weather conditions. Flower well formed, of good size, petals reflexed and sweetly scented. \$75.00 per 100.

(Anemone Flowered Clematis)

The illustration in colors in our retail catalogue for 1932 conveys a good idea of the attractive flowers of this gem among climbing plants. It is a strong vigorous grower, perfectly hardy, disease and insect proof and will succeed and flourish under the most adverse conditions. The Anemone or Windflower-like blooms are white flushed mauve pink, and are from 1½ to 2 inches in diameter and frequently begin to expand as early as the last week in April, just about the time when Wisterias have finished, continuing in bloom well through May, and are produced in great profusion. The best of the early spring-flowering climbers of which there are but few.

Strong 3-yr. field-grown, \$5.00 per doz.; \$40.00 per 100.

Pyracantha (Crataegus) Coccinea Lalandi

(Firethorn or Evergreen Thorn)

There is no other fruiting evergreen Shrub that is so attractive throughout the year as this fiery Thorn, and which will succeed in any fairly sunny position, developing into a shapely plant 6 or more feet high; it may be planted either in connection with other Shrubs or as a single specimen or may be trained with wonderful effect against a wall. Its large trusses of white flowers are followed in summer by an abundance of brilliant orange-scarlet berries, which, remaining on the plants throughout the winter produce a gorgeous effect. Strong pot-grown plants 15 inches high, 75 cts. each.

Viburnum Carlesi

A rare Korean variety which is entirely distinct with salver-shaped flowers of a delicate rose tinted white, passing to white sweet-scented flowers produced in terminal subglobose cymes 2 to 3 inches in diameter, reminding one somewhat of a spray of Bouvardia. Good bushy specimens 2 to 2½ feet high, \$1.25 each.

Viburnum Rhytidophyllum

A rare variety, particularly attractive on account of its large dark green nearly evergreen foliage, the yellowish white flowers are followed in September by red berries finally turning black. 4-inch pots, 50 cts. each; 7-inch pots, \$1.00 each.

Vitex Macrophylla

In general habit similar to *V. Agnus Castus*, but much stronger in all parts, the foliage being larger while the trusses of rich lavender-blue flowers are fully double the size. It blooms from July until frost, and is likely to become as popular as the Butterfly Shrub.

Field-grown plants, one-year old, 15 to 18 inches high, \$2.50 per doz.; \$20.00 per 100.
